PROFILE SUMMARY

React Developer with hands-on experience building and maintaining production web applications using **React.js**. Currently working on an HRMS used by **1,000+ employees**, contributing mainly on the frontend while also supporting backend work in **.NET Core** and **SQL Server**. Interested in growing deeper into backend development and building end-to-end features that are reliable, scalable, and easy to maintain.

EXPERIENCE

React Developer

Aug 2024 - Present

Technolobby Private Limited

Gurugram, India

- Build and scale React-based internal products used by **1,000+ users**, focusing on clean UI, performance, and maintainable code.
- Own features end-to-end—from requirement understanding to implementation, bug fixing, and releases—while coordinating with HR and operations teams for feedback.
- Contribute to backend tasks in **.NET Core** and **SQL Server** for API integration, data corrections, and supporting fixes needed for HRMS workflows.

HRMS Software

React.js, .NET Core, SQL Server

- Developed modules across the employee lifecycle, including applicant onboarding, multi-stage candidate processing, and employee management for **1,000+ employees**.
- Designed and implemented a dynamic **Role-Based Access Control (RBAC)** system, replacing static permissions with a configurable panel to manage modules, subcomponents, and role-wise actions.
- Integrated frontend workflows with backend APIs, supporting backend changes and SQL updates to ensure smooth data flow and fewer production issues.

KARMA – Task Tracker

React.js

- Took ownership of an existing task tracker and handled enhancements, maintenance, and day-to-day support independently.
- Implemented employee task workflows including daily updates, backlog entries (up to 4 days), task planning, and manager review/approval.
- Scaled the application for **1,000+ employees**, enabling reporting managers and senior roles to track progress and team productivity.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, C#

Frameworks & Libraries: React.js, Next.js, Redux Toolkit, .NET Core, Node.js

Databases: Microsoft SQL Server, MongoDB

Tools: Git, GitHub, Postman, VS Code, Visual Studio

EDUCATION

Indra Gandhi National Open University

Jun 2019 - Jun 2024

Bachelor in Computer Applications

Delhi, India
